

CUSTOM TRANSIT

Custom Transit from 5 Star is the ideal choice when requiring a cost effective means of protection, while maintaining a high level of durability. From Museum Artifacts to Engineering Spares and Tooling and even Library Service, Custom Transit cases offer a great handling and transportation solution.

Constructed from quality 5.5mm plywood with a stucco aluminium exterior covering, the Custom Transit range benefits from zinc and nickel plated hardware.

All exposed edges are protected by extruded aluminium profiles, groove riveted to the carcass. Polyethylene foam lining to the base and a polyester foam pad to the lid ensures protection to the internal contents.

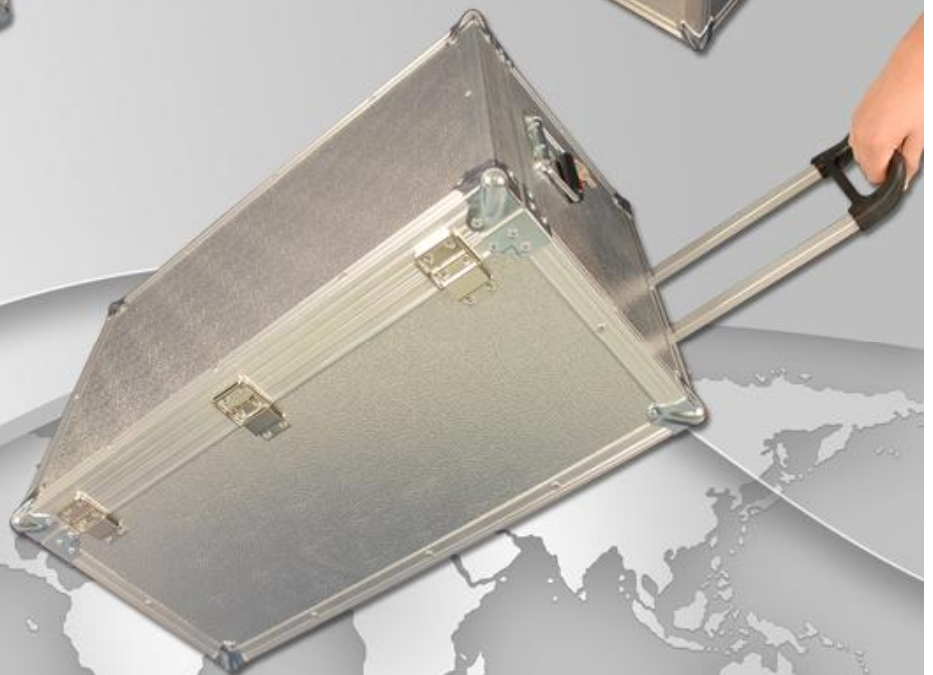

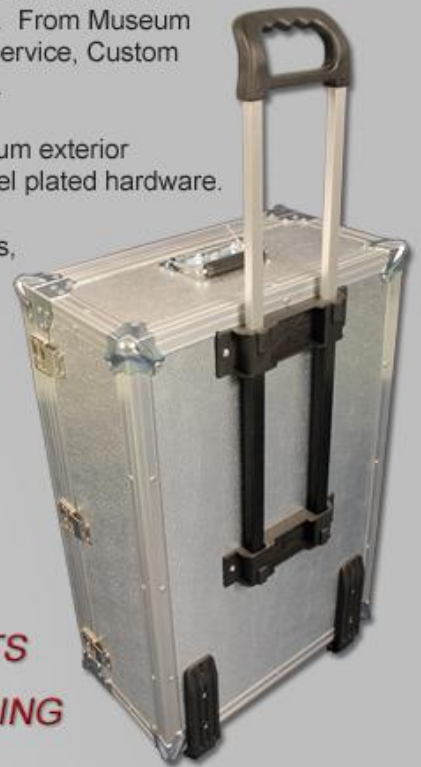

A telescopic handle and low profile wheels are fitted to the 'Trolley Box' range which ensures easy handling.
