

CASES BY DESIGN®

New from 5 Star...Poly-Pro range of lightweight polypropylene cases

Designed and manufactured in our Cambridgeshire factory using high quality materials and hardware. 1.6mm black polypropylene is used for the carcass, which is heat-scored and folded. 6mm steel rods are pre-formed and fitted to the open ends of the base and lid sections for added rigidity and durability. Bifurcated rivets secure the carcass together, whilst zinc-plated steel corners ensure extra protection. Two styles are available as standard, one having a hinged lid and the other a removable lid.

The removable lid type uses strong webbing and quick-release clips to secure, whilst the hinged version uses zinc-plated catches, hinges and webbing stays. Flip handles are riveted to each side. 10mm polyurethane foam lining is also provided for additional equipment protection. Four standard sizes are available. PAL labels shown are available as an option. For custom sizes with minimum quantities, please contact our sales team.

POLY-PRO

		Part No.	Cavity Dimensions (mm)	Lid Style	Weight
L1		76805	330 x 330 x 240	Lift-off	2.76kg
L2		76801	480 x 305 x 265	Lift-off	3.29kg
L3		76803	730 x 405 x 265	Lift-off	4.87kg
L4		76804	805 x 455 x 290	Lift-off	5.6kg
H1		76874	330 x 330 x 240	Hinged	2.94kg
H2		76878	480 x 305 x 265	Hinged	3.64kg
H3		76877	730 x 405 x 265	Hinged	5.03kg
H4		76876	805 x 455 x 290	Hinged	5.8kg
