

GENERIC SCREEN

CASES

Generic plasma, LED and LCD screen flight cases ensure maximum protection whilst keeping an eye on the budget. These cases are designed to accommodate most makes and models of screens and are available in single and twin configurations.

Featuring 30mm aluminium angle on all exposed edges, as well as dust-proof hybrid aluminium locating profile between the lid and base. Penn Elcom hardware is chosen for durability and reliability and these include four large butterfly catches, six recessed handles and heavy-duty ball corners.

100mm casters are included as standard, two of which are braked.

Equipment protection is offered by high-quality polyethylene and polyester grade foams. Suedette fabric is applied to the foam pieces that are against the displays.

The single screen design has a compartment to house baseplates, wall brackets, cables and other accessories. The twin version features an accessories compartment to one end. These cases have been designed to ensure stability when moved around on their casters.

Exterior finish is black Hexaboard as standard and a range of coloured high-pressure laminates (HPL), at additional cost.

Available in single and twin configurations.

Type A (single) - 28" to 37" screens.....part number 75953

Type B (single) - 40" to 48" screens.....part number 75954
