

# LAPTOP CASE

CASES BY DESIGN®

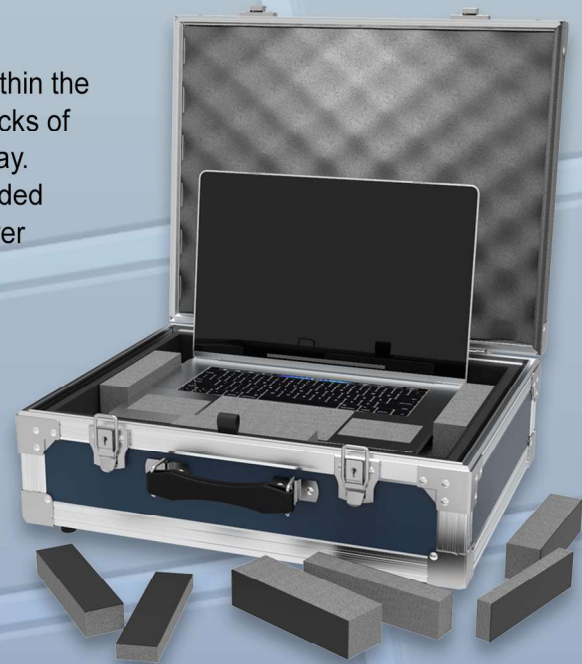

Protect your equipment in this versatile 5 Star laptop case.

Available in Light Industrial specification to keep weight to a minimum but retain durability, this case is constructed from 6mm plywood which has been bonded a high-pressure laminate (HPL) exterior covering. This HPL is available in a choice of ten standard colours, as well as black Hexaboard panel.

30mm aluminium profile protects the exposed edges of the case, whilst a dust-proof locating profile is fitted between the base and lid. Nickel-plated locking catches, strut hinges and a contoured grip carry handle are all groove-riveted to the case, as well as flat corner protectors. PAL label dishes are available as an option and come in three sizes.

This case suits most laptops up to 17" widescreen, housed in a pivoting tray within the base. Equipment protection is offered by HLB foam, supplied as 'self-stick' blocks of varying thickness which use hook & loop to adhere to the carpet lining of the tray. Simply select the nearest foam blocks to the size of the laptop. The lid is provided with profile foam (egg-box) whilst under the tray are two compartments for power supply, cables and other accessories.

Approximate external case dimensions - 500mm x 404mm x 169mm

Maximum laptop dimensions - 425mm x 330mm x 38mm
